## EDUCATION

### B. TECH

Mechanical Engineering  
Visvesvaraya Technological  
University (VTU)  
2016 - 2020

## OBJECTIVE

Passionate Full Stack MERN Developer with extensive experience in designing and developing scalable web applications. Proficient in MongoDB, Express.js, React.js and Node.js. Skilled in delivering high-quality maintainable code while staying up to date with the latest technologies and industry best practises. Committed to continuous learning and improvement, with strong focus on performance and user experience.

## PROJECTS

- **CHAT APPLICATION** | React, Node.js, MongoDB, Express.js
  - Developed a full-stack Chat application using **Node.js** and **React.js**, enabling users to sign up, log in and start real-time conversations.
  - Designed the database with **MongoDB** for efficient data management.
  - Integrated **JWT** for secure authentication and authorization.
  - Implemented features allowing users to create groups, find other users, and text seamlessly.
  - Utilized **Socket.io** for real-time chat functionality and **Redux Toolkit** for managing global state.
  - Applied **Material UI** and **CSS** for responsive and intuitive user interface Design.
  - Leveraged **axios** for API integration and data fetching.GitHub Repository: [GitHub](#)
- **E-COMMERCE** | EJS, Node.js, MongoDB, Express.js
  - Developed a responsive e-commerce web application for selling sports products using **MongoDB**, **Node.js** and **EJS** as the template engine.
  - Enabled user account creation, Wishlist and cart management, invoice downloads and purchases with multiple payment options.
  - **Admin panel** includes features to block and unblock users, add and edit products, control order statuses and view total sales reports
  - Built the backend with **Node.js** and **Express.js** and managed the database using **MongoDB**.
  - Integrated **Razorpay** for payment processing and **Google OAuth** for secure Google login and signup.
  - Implemented **Nodemailer** for email notifications and verification processes.
  - Used **Chart.js** in admin panel to display sales reports.
  - Styled the application with **Bootstrap** and **CSS**.Live Demo: [GearPlusX](#) | GitHub Repo: [GitHub](#)
